Perhaps you're just suckers. You don't belong here if you don't know what an apktool even is. App does not do what it was meant to do. I would like a refund or a link for older versions. Even after following the "fix" instructions, it still doesn't work. The app I had modified crashed repeatedly. I WANT A REFUND. However, once you follow the instructions, your time for a refund has ended! Google must investigate! This was a great program. But, I don't know how to make it simple edit anymore. This was removed. I've been able to go into manifest and add a line to make android:installLocation preferExternal, but I haven't been able to save/install the modified code. Okay, I tried manually to install the app that I wanted, as your video shows. I had no luck downloading or installing the app that I needed. This APK Editor was not able to install my app. I would be grateful for a refund. It took me about an hour to get it working. I tried. Thank you
