Here is the Wordle answer today for the 1352 word, released on March 2nd, 2025 and some hints to help you solve it. Wordle is a very popular word game that has gone viral due to the results being posted all over social media by players and the simplicity of the game. The aim is to guess the five-letter American English word in six guesses or less. There are no initial clues given as to what the word could be, but once you have made a guess, the tiles will change colour letting you know more about the letters in the word. The three different colours the tiles could change to are grey, yellow, or green. Grey indicates that the letter you guessed is not in the word at all, so you should avoid using it in future guesses. Yellow indicates that the letter does appear in the word, but not in the position you have it in now. Green indicates that you have guessed the correct letter and placed it in the correct location, which is the colour you want to see! Wordle Game - How to Play There is also a hard mode for the game in which you are forced to use any correctly guessed letters from the previous row in every guess you make. You may already do this, but there are times when there are multiple answers for the Wordle and you need to guess a word that contains the potential letters to help you solve the Wordle, which you will not be able to do with this mode. You can always turn it back off during the game as well if you find it too difficult. Hints for the Wordle 1352 Hints today - 2nd March, 2025 As the word can be quite difficult, we have some hints for Wordle 1352 to help you to solve it, which are: Hint 1: Contains the letter T. Hint 2: It starts with the letter D. Hint 3: There are two vowels in the Wordle answer today. Hint 4: It is a noun. Hint 5: A god or goddess (in a polytheistic religion). Eight Great Wordle-likes Looking for an alternative to Wordle? Here are eight of our favourite Wordle-likes to add to your morning puzzle routine. Watch on YouTube What is today's Wordle answer on Mar 2? It's time to reveal the answer to today's Wordle. The word is... ABOVE. The abundance of common vowels in this answer hopefully helped guide you towards the correct solution in good time, although working out just where the heck they all belong may have been a stumbling block. What does the Wordle answer today mean? 'Above' is a preposition meaning, broadly, "higher than". This can be either mean literally "positioned over in a physical space", or more metaphorically "more than an expected or average amount". So, for example, the former might indicate that the flat you're renting is above a business because it's on a higher floor of the same building; while the latter might be used when said business makes profits above their financial estimates for the year. How to share your Wordle results without spoilers Use the built-in Wordle sharing feature to share your results without spoiling the answer! Wordle has a built-in method of sharing your results in a spoiler-free way, so that those you sent it to don't see today's Wordle word itself, only the colours in your grid to show how well you did. To share your Wordle results, simply complete (or lose) today's Wordle, and then wait a moment for the statistics panel to appear on your screen. Then tap the "SHARE" button. On PC this will simply copy the text into your clipboard, so you can then paste the text anywhere you wish, whether it's a private message or a status update on social media. On iPhone or Android, when you tap the "SHARE" button you'll have the option either to copy to clipboard, or to share the results directly to another app on your phone (such as WhatsApp or Twitter). Using the built-in sharing feature of Wordle is a much nicer way of sharing your results than potentially spoiling the answer to those who haven't yet had the chance to play today's Wordle themselves. So we highly encourage you to use it! How to play Wordle Wordle is wonderfully simple. The aim is to guess the correct five-letter word within six guesses. After each guess, the letters of your chosen word will highlight green if they're in the correct place, yellow if they're in the wrong place, or grey if they don't appear in the word at all. Using these clues you can start to narrow down the correct word. Head over to the Wordle site to try it for yourself! How did Wordle begin? Wordle began life as a little family game created by software engineer Josh Wardle. He created the game so that he and his partner could play a fun little word game together during the pandemic, and they quickly realised that there was something quite special in this simple little guessing game. So after a bit of refinement, Wardle released it to the public on his website, Power Language. The game was released in October 2021, and by the end of the year the game had two million daily players. It became a viral hit, thanks in large part to the ease with which players could share their results in a spoiler-free manner on Twitter and other social media sites. In January 2022, Wardle accepted an offer from the New York Times to acquire Wordle for a seven-figure sum. Well done, Mr Wardle. Well done indeed. Are any Wordle words not allowed? You can type in any words you like, but be aware that the actual answer will never be a rude word. You can type in pretty much any five-letter word in the English language and Wordle will accept it as a guess. However, the answer is picked each day from a much smaller list of more common five-letter words. There are still thousands of possible answers, of course, but it means the answer will never be a word as obscure as, say, "THIOL", or "CAIRD", or "MALIC" (yes, those are all real words). There are very occasional words which the New York Times will choose not to publish as the day's Wordle answer, perhaps for reasons relating to recent news or politics. For example, shortly after news broke that Roe v Wade might be overturned in the United States, the NYT decided to change the March 30th word from "FETUS" to "SHINE", as the feeling was that the word "fetus" was too politically charged a word in the context of recent events. The New York Times has also been careful never to allow what they consider to be rude words as the answer to a Wordle puzzle. But of course there's nothing stopping you from using even the dirtiest of words as guesses, as long as they're accepted words in the dictionary, and as long as you realise that they'll never end up being the answer. Is Wordle getting too easy for you? If Wordle is starting to get too easy, there are a few ways you can make the game more challenging for yourself. The first choice is to turn on Hard Mode. You can do this on the Wordle site by clicking the cog icon in the top-right of the screen. Hard Mode means that any highlighted letters must be used in all future guesses. This stops you from using the common tactic of choosing two words like "OUNCE" and "PAINS" to test all five vowels early on. You can take it up another notch by playing by what we call "Ultra-Hard" rules. This means that every guess you enter must potentially be the answer. If you were just playing on Hard Mode, and you typed "MOIST", and the "O" appeared yellow, then nothing would stop you from making "POLAR" as your next word, even though it couldn't possibly be the answer because you already know the "O" is in the wrong place. If you play by "Ultra-Hard" rules, that's not allowed. You must adhere to every clue, and make sure every single word you enter is potentially the answer. If after all that Wordle is still too easy for you, then you could always try one of the many other Wordle-inspired games online that have cropped up over the past year. One of our favourites is Wordle, in which you must guess a country of the world based on its shape. There's also Waffle, which is about swapping letters in a completed grid to complete all the words; Moviele, which shows you an entire movie in a tiny space of time and challenges you to guess the movie within six guesses; and Quordle, which tasks you with solving four Wordles at once with the same guesses. Domyślnie składa się z 5 liter, ale na naszej stronie możesz ustawić ilość liter od 4 do 11. Następnie jest 6 wierszy, w których możesz wpisać dowolnie istniejące słowo. Wpisując pierwsze słowo, próbujesz nie tyle odgadnąć słowo od razu, ale po prostu pierwszy krok w grze, w którym możesz uzyskać wskazówki dotyczące odgadniętego słowa. Po wpisaniu pierwszego słowa i naciśnięciu klawisza Enter, wszystkie litery Twojego słowa zmienia się w jeden z trzech kolorów - szary, żółty i zielony. W zależności od koloru otrzymujesz informacje o tym, które litery znajdują się w ukrytym słowie, a których nie ma. Tutaj wszystko jest całkiem proste. Litery w kolorze szarym - nie ma ich w ukrytym słowie, można je wykluczyć. Litery, które zmienia kolor na żółty - są w ukrytym słowie, ale są w innym miejscu w słowie. Nawiasem mówiąc, istnieje możliwość, że w słowie jest więcej niż jedna taka litera, ponieważ litery mogą się powtarzać (lub nie mogą się powtarzać). Ale najważniejsze jest to, że zdecydowanie nie są tam, gdzie są w słowie, które wpisałeś. I wrzescie zielone litery. Gratulacje, te litery znajdują się w ukrytym słowie i znajdują się dokładnie w miejscu, w którym są w twoim słowie. Tutaj również nie należy zapominać, że te litery mogą znajdować się w ukrytym słowie w innych miejscach (albo nie być). Następnie wpisujesz nastepne słowo i nastepne, uzyskując w ten sposób coraz więcej informacji o ukrytym słowie. Twoim zadaniem jest jak najszybsze uzyskanie wystarczającej ilości informacji, aby odgadnąć ukryte słowo. Im mniej słów wpisałeś, im mniej prób wykonałeś przed odgadnięciem słowa, tym fajniejszy jesteś! Ważne jest tutaj zarówno słownictwo, jak i umiejętność logicznego myślenia. Cóż, czas spróbować!
