What is the best video editing apps. Good free video editing apps for android. Which app is best for video editing for android. What are some good video editing apps for android. What is the best video editing app for android phone.

While video editing apps are best utilised on a larger screen of a laptop or PC, there are plenty of apps providing video editing tools on your phone to make your videos look professional, especially when the content creation demand is on a rise. The experience may not be the same as that of professional video editing softwares on a PC, but you may still be able to perform the basic editing functions like chopping, transitions, adding music, colour correction and more. Before you go on to install a video editing app, let's take a look at what you should look for and what you should avoid while choosing the app. A video editing tool should be able to perform basic editing functions such as adding, removing sections of video and audio, render speed, filters and other enhancements and creating transitions between clips. Before you get a video editing tool, you should know its drawbacks and why you should avoid it. There are plenty of free video editing apps on Android which you can avoid due to bloatware and, and watermark which may not be suitable for professional videos. A busy looking UI makes it more difficult for you to focus on the editing tasks. While most of these apps are paid, you can get that free version as well but it comes with distracting ads and the video has a watermark of the editing app. App Features Reasons to avoid Size Price KineMaster in-built graphics, fonts, stickers, transitions, clips Voice overs, voice changers, sound effects, background music Not suitable for beginners 66MB Free, \$18.1 per year VivaVideo Short video maker in-built editing effects. Tough to manage more than one video/audio file Ads 88MB Free, \$11.85 per year VideoShow Reduce video size in the app, Easy to use Loss of quality after export Limited themes 39MB \$135.19 per year InShot Split, trim and cut videos. Merge and join clips from two videos. Multiple format support You cannot undo edits 46MB \$9.06 per year PowerDirector Supports 4K resolution videos, Video stabilizer Ads, bloatware 83MB \$39.72 per year WeVideo With higher plans, it supports 4K UHD videos, Effects such as blurred background Limited music and font 23MB \$3.76 per year Quik Exports HD 1080p videos, Suitable for GoPro Videos No watermark Less customisation due to automatic edits 117MB Free, in-app purchases It is an advanced video editing app that brings tons of features and allows many customizations. It has several transitions, effects, videos and images. It can be used by both professionals as well as beginners. It is a basic video editor that can be used to create small music videos. You should be able to merge clips, add animation and enhance your videos using filters. It can be used by both beginners and some advanced-level professionals as it comes with many editing functionalities such as filters, themes, effects and more. You can even add subtitles to your videos. The basic editing tool has features like trim and cut, effects, music, texts and more. It is suitable for creating short videos for social media platforms. The most important feature of this app is its compatibility with 4K videos. You would be able to add music, transitions, effects and more to improve the quality of your output. WeVideo offers multiple plans including professional and unlimited plan at a higher premium. With that, you can get a larger music library and more themes to choose from. It is a free app that is developed by GoPro. It offers basic editing tools to enhance your GoPro videos and make them shareable. SEE ALSO: People looked up TikTok more than Google making the short videos app the most popular domain in 2021 Upcoming WhatsApp features: New admin controls, shortcuts for quick replies, message reactions and more Joe Hindy / Android Authority Video editing is one of the heaviest tasks that a device can perform. On computers, it requires decent specs, tons of RAM, tons of storage, and some know-how on how to make it work. Phones do not have the specs or power to replicate experiences like Final Cut Pro or Adobe Premiere Pro. However, some apps can do the basic stuff pretty well. It's even good enough for some pro vlogging with some patience. You can also click here to see the best video editors on iPhone. For the most part, most of today's mobile video editing is for Instagram Reels, TikTok, and similar use cases. We have full-featured video editor apps listed below, but we also made sure to list some simpler video editors designed for minute-long videos like you see on Reels or TikTok. The best video editor apps on Android ActionDirector is one of the most popular video editing apps on PC. It's also available on Android. It does the basics. You can import clips, edit them, and render the video. You can do things like add your own music, trim and cut video, add text, employ slow motion, and more. It's one of the few video editor apps that also supports 4K video. You'll have to check and see if your device supports it, though. The developers have a nifty tool linked in the Google Play Store to see if yours can. It also gets frequent updates. See also: The best camera apps for Android Price: Free / Up to \$53.99 per month Adobe Premiere Rush is one of two above-average Adobe video editor apps. The other is Adobe Premiere Clip which is closer to a standard mobile video editor. Anyway, Adobe Premiere Rush is one of the newer video editor apps on the list and it's quite good. It comes with a lot of must-have features, including multi-track timelines, cloud syncing, and some advanced editing tools. The app still needs some UI work and some bug fixes, but it has a ton of potential. Plus, it's included in the Adobe Creative Cloud subscription so it's worth a shot if you use that service already. Fun fact, the mobile version of Adobe Lightroom (Google Play) actually includes some video editing features as well. Price: Free with in-app purchases CapCut is a simple, effective video editor. It's aimed mostly at TikTok creators, but you can use it for Reels and YouTube Shorts as well. It specializes in short-form video. There is an exhaustive supply of filters and templates you can use. They are used to emulate existing trends and some of the filters are just fun. You do get some more traditional video editing features like keyframe editing, slow motion support, the picture-in-picture function, and more. The best part is that the app didn't bother us to pay for anything while we tested it out. There are in-app purchases according to Google Play, but we didn't find them during our testing. FilmoraGo is a video editor app by Wondershare. It's easily one of the best video editor apps. This video editor packs a wallop. You can do the basics like trim and cut, render, and that kind of stuff. It also includes the ability to play in reverse, do square videos (1:1) for Instagram, and 16:9 videos for YouTube specifically. It also has support for things like slow motion, transitions, music, overlays, and more. It's not half bad for what you get. There are in-app purchases that add to the power. However, most of the features are, in fact, free. See also: How to become a video editor online Price: Free with in-app purchases Funimate is one of the surprisingly popular, but not overly powerful video editor apps. It bills itself as being a great app for making music videos or simple videos out of the stuff you already have on your device. There are 15 video filters that you can play with and the creation process is fairly painless. This isn't something you'd want to use on a serious video. It has things like video effects. However, it's better for short little social media posts rather than actual video production. You can download it for free to try it out yourself. GoPro Quik is from a newer generation of video editor apps. It's halfway decent if you need something simple. The way it works is you add up to 50 photos and video clips into the app. The app then analyzes them and spits out a short video from them. Quik contains about two dozen video styles and you can re-order and customize your video before you export it. It's not nearly as powerful as something like Adobe Premiere Clip or PowerDirector, but not everyone needs something that intense. It's free to download with no in-app purchases. See also: The best social media apps and other interesting options Price: Free / \$2.99 per month / \$9.99 per year / \$29.99 once InShot is a super simple video editor with a heavy focus on things like filters, video trimming, and shorter videos. It has a reasonably simple timeline editor with multiple video and audio channels. You also get basic tools like cropping, a selection of music, and various other small things like fading in and out. Its toolset, sticker packs, speed controls, and other features make it great for things like YouTube, TikTok, and similar platforms. We also quite like how it has a single price tag alongside its subscription in case you want to go that route. See also: The best photo editor apps for Android Price: Free / \$4.99 per month KineMaster is one of the most powerful video editor apps available and also one of the first. You can do the basics as most of these other video editors can. However, this one includes multiple video, image and effect layers. Additionally, there are audio filters, chroma-key (for your green screen fans out there), various video effects, transitions, and more. It's not as powerful as a full desktop editor. However, this gets much closer than most other competitors. We would recommend this for actual video production (at least for stuff like YouTube). You can use it for free in trial mode for a while. However, you'll need the \$4.99 per month subscription to get everything forever. See also: The best gif creator apps and GIF editor apps for Android PowerDirector is one of the most comprehensive video editor apps on this list. It comes with a ton of features, including quick editing tools, various effects and other tools, and it even comes with things like a collage maker and slow motion support. The interface is relatively easy to work with and it utilizes the classic timeline editor method. It should be more familiar for those who video edit often. It's free to download and use, but you'll need to fork out some extra money to get all the features. This is a for-real video editor, especially for larger screens like Chromebooks or tablets. VivaVideo is one of the exceptionally popular video editing apps. In practice, though, it's a very middle-of-the-road video editor. It works especially well for short clips for social media. The app uses a storyboard style of editing where you load clips, edit and trim them as needed, and then move on to the next segment. It includes over 200 video filters and various other effects, text input, and fast and slow-motion support. VivaVideo has a free version that comes with a watermark and a time limit for any given video. You can remove these restrictions by buying the pro version. If we missed any of the best video editor apps for Android, tell us about them in the comments. You can also click here to check out our latest Android app and game lists.
