Build royale battle royale

Initial release.build Royale.io is a 2D shooting game I must build and booty to improve your weapons and defeat all enemies. Contract, breakage and eliminating opponents to improve your place. Are you sure? How to delete opponents, you can plunder them to improve your inventory. Also remember that if you see bullets that you approach, please! As you play preparing, they will put in a lobby. During the lobby before the game you will be able to practice your building, play soccer / basketball and interact with other people in the lobby. Once enough players were the United States, you will be placed in the real game in a place at the run of the map, so you have to prepare the chest opening and lifting the plan to start eliminating opponents. Another important part of the game is soon to compile materials. The trees, tables, chairs, etc. They will give you wood, the stones will give you bricks and only a couple of elements throughout the map will give you metal, so it is the most rare and effective material for use. Like game progress, make sure you proceed with the control of the map, because the red storm will arrive slowly. If you are trapped in the storm, you will receive damage and that amount of damage increases as game progress, so as to get trapped in this in principle is not a big problem. Also be sure to provide healing in the event that you shoot or interfered in the storm. If you survive enough, with sufficient construction and shooting skills, you can win the game or finish in a second or third place. Are you sure of a homemade? Share with your friends on social networks: build royale is a multiplayer game where you can show the leadership of him and your expert player skills in all your splendor. Here you can play with players around the world and also form a small band. Before starting the game, you need to insert your nickname and select the game mode at the top right: only, for two and a squadron. If no choice is performed, then plays automatically in a player's mode. How to play? Your task is to survive in a space surrounded by a poisonous ring. It will gradually be reduced until you reach a critical dimension. The one who is the only survivor of the royal battle win. Until the red area fills the field, it is necessary to collect useful elements and extract resources: wood, stone and metal. With these resources you can build walls and then escape enemy attacks. If you don't want to hide, you can attract yourself. To do this, he collects a great arsenal of all kinds of arms and shop cartridges. Once the arsenal is ready, you can go hunt! Let the enemies tremble fear and to be reached by your bullets.
