MX Player is a free media player app for Android and iOS smartphones specializing in videos but also capable of playing audio. The latest updates work on iOS smartphones and Windows PCs. It can reproduce videos in Full-HD and 4K/Ultra HD quality, and it reads, edits, and syncs subtitles. It supports all video and subtitle file formats. Tricks for optimum video viewing on your phone: The smartphone is becoming the most versatile tool for everyday living. You can do almost everything on your phone nowadays. Portable in your pocket, backpack, or purse, smartphones are now indispensable for business and leisure in modern society. Video streaming sites are rising in popularity faster than the television did back in the 1960s. You can watch full movies and series on your phone streaming from popular sites like Netflix, Hulu, Disney+ and Gaia. Watch and share live videos on YouTube or Facebook. Get gaming tips from Xbox Live and PlayStation Live. Take videos of your favorite moments with your phone camera and upload them for your friends to see. You need a media player app that can keep up with your digital world. MX supports all video formats including MP4, AVI, 3GP, WMV, MKV, and others. It can read and edit subtitles in SSA/ASS, SRT, TXT, and VTT file extensions. If you want to upgrade your ad-sponsored free MX Player for Android to the one-time payment, ad-free MX Player Pro, you can get uninterrupted video viewing with the app's basic functions. As this new version is still in development, it won't support all online video streaming sites in certain regions. The best gesture control on smartphones With its new HW+ decoder for hardware acceleration, and its multi-core decoding for better playback performance, the MX Video Player accepts many gestures for easy action control. Pinch to zoom in, expand to zoom out, swipe across the screen to pan, and tap to play or pause. Get more options with the hard-press secondary menu. The MX Player loads all the videos on your phone to its library upon installation. Access all your videos from one application, no matter their format. You won't have to worry about your children messing up your phone or opening apps they shouldn't while watching videos. The Kids Lock function lets parents lock the screen on the video currently playing so that random gestures won't stop the video, close the app, open a new application, or change phone settings. You can take out the Kids Lock by tapping on a specific point on the corner of the screen. For subtitles, scroll forward or backwards to see the next or previous text, scroll up or down to move the next and pinch or expand (zoom in/out) to change the size of the text. The app supports subtitles in several languages, and you can edit the text properties such as size, color, and outline. This media player needs permissions: Different apps need different permissions so they can access certain features on your smartphone. You must give all the following permissions to install the MX Player: Location to find friends for video transfers and secure streaming access, and Bluetooth for AV sync and file transfer. Read and write external storage to run your media files and rename or delete videos and save downloaded files. Network, Wi-Fi, and Internet for downloads, updates, and direct streaming. Camera to create your own videos. Vibrate for notifications and control of feedback due to phone vibration. It can be somewhat tedious to have to accept each permission as it comes out on the screen for you to be able to install the app. The installer has trouble loading all the right functions if you refuse to give permission. Tap on 'Accept' every time the system asks, for it not to cancel the download. Sharing videos with smartphone-incompatible friends Do you feel that you can't share videos with your friends because you have an Android and they have iPhones, or vice-versa? Sharing videos doesn't have to be hard. There is an easy way you can share videos you took with your phone camera so that anybody can watch them, even if they have a different operating system on their phone. If you upload your videos to Google Photos, you will get a link that you can share with all your friends via text message, email, WhatsApp, Skype, or social media apps, so they can download the video wherever they want. Most smartphones have Google Photos preinstalled, but if you don't have it, you can get the app in the Google Play Store or the iOS App Store. Google privacy settings make it safe and user-friendly. Don't shun your friends because of their phones. There is an easy way for all to share your favorite moments. The leading media player for smartphones The MX Player for Android and iPhone is ad-supported freeware that can play any video file with or without subtitles in many languages and formats. It's an excellent tool for running video or audio files downloaded from the Web, taken with your phone camera, or played from video streaming websites. The app requires many permissions for optimum performance, and won't install on all smartphones. In case your phone cannot support the application, even with an APK file, you can try KMPlayer for smartphones and Windows, or VLC Media Player for Windows, Android, Mac, and iPhone. APK files are essential for installing the best software for Android, such as Google Chrome, Among Us, Avast, PUBG Mobile, and Facebook Lite. You'll need the latest versions of these apps to access new features and gameplay. Make sure you check our list for any APK files you need for your Android device. Free Download for Android Free Download for Android Free Download for Windows Free Download for Android Free Download for Android Free Download for Windows Free Download for Android APK Editor is a free utility tool developed by SteelWorks for mobile devices. It is an Android Package (APK) editor that lets users open and modify various... Android and Android tools Free Download for Android Free Download for Android Free Download for Windows Free Download for Windows Free Download for Android In this post, you will get a complete tutorial on how to install Cinema HD on Nvidia Shield Pro and Nvidia Shield Tablet. This app was formerly known as Cinema APK. This is one of the best movie apps out there. Users can watch many movies and TV shows after installing the app. You can also use this app with Real Debrid for better quality content. Do you have a trakt account? Then, you can sign in to your account and manage watch history across the devices. This is an Android app. Nvidia Shield Pro runs on the Android operating system. So you can install the application easily. Let's see how you can do that. How to Download & Install Cinema HD on Nvidia Shield We are going to use Downloader app to install third-party apps like Cinema HD APK on Nvidia Shield. This is a browser that lets you access websites on Android TV. Cinema HD app is not available on the official store so we have to sideload it. For that, we have to enable apps from unknown sources option. This is similar to installing Cinema HD APK on Firestick 4K 1. Install Downloader to install Cinema HD Here are the steps to get downloader app on your Nvidia Shield Pro: Go to the home screen and click on Google Play Store Hit on search and type in "Downloader" using your remote You will see the downloader app in the related searches section Click on install to complete the installation. Hit on open button to start the application. 2. Download Cinema HD APK on Nvidia Shield & Install: Now, we will see how to download and install Cinema HD APK on Nvidia Shield Pro. Follow the instructions carefully to avoid any kind of errors. Open the downloader app from the apps section. You will see the URL section on the home page. Enter cinemaaapk.com and click on GO A web page will open on your device. Scroll down and click on Download Now The Cinema APK will download on your device. Note: Here, your device will say "your phone is not allowed to install unknown apps". We have to enable apps from unknown sources. Click on Settings >> Toggle the button next to Downloader Get back to the downloader app home screen and you will see Install button there. Click on that and follow the regular installation process as you do on your Android phone. You will see "App Installed" on your screen. That means the installation is completed. Click on "Open" to launch the app immediately and browse the content. If you want to free up some space on your Nvidia Shield by deleting the APK file you downloaded, click on "DONE". You will see the "Delete" button. Frequently Asked Questions About Cinema HD APK on Nvidia Shield: 1. Why is Cinema HD not available on Google Play Store? The app is not available on Google Play Store because it does not comply with the conditions of the app store. 2. Can I use ES File Explorer to install Cinema APK on Nvidia Shield? Yes! You can use the ES File Explorer browser instead of the downloader to get cinema HD on your device. 3. Can I log in to Real Debrid on Cinema HD Nvidia Shield? Yes! You can log in to your Real Debrid account on the Cinema HD app. Launch the app, go to settings, and there you will find the option 4. Can I choose my own player on Cinema HD Nvidia Shield? Yes! You have the option to choose your preferred player. But, We recommend you use the built-in player. 5. How to Update Cinema HD V2 on Nvidia Shield? You can go to the official site and search for the updates or you can open the app check for the updates from the menu.
