El Dorado, the legendary Lost City of Gold, was a lighthouse for thousands of explorers and golden hunters for sémeros. Desperate men from all over the world came to the Southern African America to find the city of El Dorado and many have lost their lives in hard plans, steam jungles and Frosty mountains of the dark, unexplored interior of the continent. Although many men claimed to know where he was, El Dorado was never found ... or have you? Where is El Dorado? The legend of El Dorado began around 1535, when the Spanish conquerors began to hear rumors from the northern mountains of Andes. The rumors said there was a king who covered himself with gold but jumping to a lake as part of a ritual. Conquistador Sebastián de Benalcázar is credited for being the first to use the term "El Dorado", which literally translates into "the golden man." At the same time, greedy conquerors began in search of this kingdom. In 1537, a group of conquerors under Gonzalo JimÁ © Nez de Oquesada found the people who live in the Plateau of Cundinamarca in the current colony. This was the culture of legend whose kings were covered with gold before jumping to Lake GuatavitÁ; The Muisca were conquered and the lake was dredged. Some gold was recovered, but not much: Greedy conquerors refused to believe that the lake's Meager crops accounted for the "Real" El Dorado and promised to continue searching. They would never meet him, and the best response, historically speaking, for the issue of El Dorado's location remains Lake GuatavitÁ; The central and northern parts of the Andes Mountains were exploited and no gold city found, the Legend City Location has changed: now it was believed to be the east of the Andes, in the vapor soup. Dozens of expeditions came out of coastal cities like Santa Marta and choir and villages of tall lands like Quito. Noticeable explorers included ambrosius ehinger and Von Hutten! An expedition departed from Quito, led by Gonzalo Pizarro. Pizarro returned back, but his lieutenant Francisco de Orellana continued to go east, discovered the Amazon River and followed him © the Atlantic Ocean. A Spaniard named Juan Mart A-n of Albuja was captured and held for a while by indigenous peoples; he claimed to have been given gold and taken to a town called Manoa, where a rich and powerful "Inca" ruled. Until ©, the eastern Andes had been quite well explored and the largest unknown space left were the Mountains of Guyana in© northeastern South America. Explorers conceived a great kingdom there that had separated from the powerful (and rich) Incas of Peru. It was claimed that the town of El Dorado, now called Manoa, also ©, was on the shores of a large lake called Parima. Many men tried to reach the lake and the city during the period of about 1580-1750: the greatest of these seekers was Sir Walter Raleigh, who made a journey © there in 1595 and a second in 1617: he found nothing, but died believing that the city was there, just out of reach. As explorers approached every corner of South America, the space available for a large© and wealthy city like El Dorado to hide became smaller and gradually convinced that El Dorado had just been a myth to start with. Still, as late as the 1772 expeditions were still equipped and established with the purpose of finding, conquering and occupying Manoa/El Dorado. It took two rational minds to really kill the myth: the Prussian scientist Alexander von Humboldt and the French botanic Aimahamy Bonpland. After obtaining permission from the King of Spain, the two men spent five years in Spanish ©, engaged in an unprecedented scientific study. Humboldt and Bonpland searched el Dorado and the lake where it was supposed to be, but found nothing and concluded that El Dorado has always been a myth. Time, most of Europe agreed with them. Although only a handful of crazy still In the lost city of legend, the legend entered the popular culture. Many books, stories, songs and movies have been made about El Dorado. In particular, it has been a popular theme of the films: still in 2010 was made a Hollywood movie in which a dedicated and modern researcher follows ancient clues to a remote corner of Amman © rich in the South where it locates the lendery city of El Doradois just in time to save the girl and get involved in a shootout with the bad guys, o © Absolutely. As a reality, El Dorado was a failure, never having existed, except in the feverish minds of gold-mad conquerors. As a cultural phenomenon, why © m, El Dorado has contributed a lot to popular culture. There are several ways to answer this old question of age. Practically speaking, the best answer is not © Nowhere: the city of gold never existed. Historically, the best response is © Lake Guatavit, near the Colombian town of BogotÁ. Anyone looking for El Dorado today probably does not have to go far, as there are cities named El Dorado (or Eldorado) all over the world. There's an Eldorado in Venezuela, one in Mom © Mexico, one in Argentina, two in Canada and one Eldorado province in Peru. El Dorado International Airport is located in Colombia. But by far the place with the most Eldorados is the US. At least thirteen states have a city called Eldorado. El Dorado County is in California, and Eldorado Canyon State Park © One of the favorites of the Colorado rock climbers. Silverberg. Robert. The Golden Dream: the seekers of El Dorado.
