A New Look at the Puppet in FNAF Movie 2. u/thebiteof 83 A New Look at the Puppet in FNAF Movie 2. Go to fridaythe13th r/fridaythe13th After it Jason went on to have fun in space, while Freddy wasn't heard from again New to Reddit? Create your account and connect with a world of communities. So we know that the five kids (Gabriel, Susie, Jeremy, Fritz and Cassidy) possessed the original animatronics (Freddy, Bonnie, Chica, Foxy and Golden Freddy) But which child possessed each animatronic? Do we have a confirmation for any of them beyond Susie possessing Chica and Cassidy Possessing Golden Freddy? Go to GameTheorists r/GameTheorists Okay so I was watching SuperHorrorBros new video explaining the story of FNAF Security Breach and in the video he had his own theory that Glamrock Freddy could have the soul of Michael Afton in him, and there is too much evidence to ignore it. For one, Glamrock Freddy said he was taken underground to the old FNAF 6 location under the mall. Michael Afton died there with his dad William. And as a rule in the FNAF universe if you die your soul is either bound to a place or a robot. Also, Gregory has a striking resemblance to the Crying Child. Same hair color and similar clothes. I don't think they're the same person but whenever Gregory asks Freddy why he's helping him all Freddy can say is "I don't know" maybe he has such a desire to help because Gregory resembles Michael's brother so heavily, and as a way to get rid of his guilt from... Y'know.... Getting Evans head bitten off, he decides to help Gregory escape. The one only thing that might discount this theory and poke a hole in it is that Michael was burned, which means that all the remnant inside him and his spirit should be released. But it didn't stop William, so maybe Michael found a way to cheat death too. Maybe it runs in the family. Also once more THIS IS NOT MY THEORY. This is a theory from SuperHorrorBro on YouTube. Using the FNAF Non-VR Help Wanted Gallery, I used Funtime Freddy's height to get the heights of the other animatronics. This post will be updated over time. Also of note is that these heights are from the feet to the top of the head, ears and hats aren't included. I only decided to include characters that jumpscare the player, so if you have anything you want me to include, post in the comments. I'm holding up pretty well but night 3 scares me. Everyone says that Freddy is not like others and he is the hardest. So, i know that whenever i need to check cameras, i close the right door and the other tactic is that i need to just keep an eye on Freddie. Apparently if you don't use the monitor, you will be safe too but i don't trust it. So, what do i do? Thank you!! Hi everyone can you help me fill up the list of possessed animatronics(canon). Puppet(Charlie) Circus Baby(Elizabeth) Molten Freddy(???) Classic Freddy, Chica, Bonnie, Foxy and Golden Freddy(5 kids) Springtrap whether William was alive or not Are there more possessed animatronics? And who is Molten Freddy?
