NEARBY BUS STOPSPINNED BUS STOPSSeats availableStanding availableFull Capacity The Gothere Maps API allows anyone to build their own programs using Gothere maps and data, whether they're on the web, the desktop or mobile devices. It's designed to make it possible for anyone to integrate Gothere Maps and services into other applications. What are you waiting for? Read our Getting Started guide, or learn by Examples. Alternatively, if you are a kick-ass developer, dive straight into our API Reference and start coding! NEW: Bus stops and MRT/LRT stations are now available through the GAmenities class. Using the Javascript API The recommended way of using the API is shown in the Getting Started example. The API is loaded using the following script tag.
