Environment vocabulary b1 pdf

Environment vocabulary b1 pdf.

Example Example A rain acid rain rain is very harmful to the environment. Aerosol, spray aerosol sprays are the worst cause of pollution at home. To influence this area has been influenced by the flood. Only the huge trees had been paired for years before they were felled. Atmosphere The earth's atmosphere is a thin layer of gas surrounding the earth. To be aware, I think my neighbor is not aware of polluting the environment. B Balance The balance of nature could be disturbed. Biodegradable All our products are biodegradable. BIODIVERSITY How about an evening walk to watch biodiversity in our park? Biosphere The biosphere is the part of the atmosphere and the earth's surface where animals and plants can live. C Carbon Carbon is a chemical contained in all plants and animals. Carbonic anhydride The concentration of carbon dioxide in the atmosphere is low. Carbon monoxide monoxide is emitted by car. The catalytic converter since 1993 catalytic converters were mandatory in Great Britain. Catastrophe Florida Hurricane Catastrophe Fund (FHC) was created in November 1993. To break down the poor people often cut the trees for firewood. Climate The Mediterranean climate is good to grow citrus fruit. Coastal waters Many bays and coastal waters have been contaminated by heavy metals. The cooling agents of the cooling agent are expensive. To fight there should be more rigorous laws to fight atmospheric pollution. To contaminate the soil has been contaminated. Is the creature a marine creature or not? D Death of forests The death of forests is a big problem in Europe. Destroying the house was completely destroyed by fire. Destruction The use of renewable sources could stop the destruction of rainforests. The detergent tries to use detergents that are free of perfumes. To die the animals are dying much more often than you can think about. To decrease people try to reduce water pollution. Dirty the dirt was removed from the ground. To disappear many disappeared species in the last century. Disaster The recent earthquake in India is a disaster. Unfortunately, fewer people know the disposal of hazardous waste. Sicily The security had ruined crops year after year. To dry, for the parina during the long period of security, many rivers dried / annoyed. To download old washing machines were downloaded near the beach. The dumping of the terrain city channels are often used as dumping reasons. Powder does not inspire dust, it is dangerous. And earthquake on April 18, 1906, shortly after 5:00, a great earthquake hit San Francisco. Ecological oil pollution could damage cost ecology. Ecosystem Jordan has appealed to assistance to help save the Dead Sea ecosystem, whose water level is dropping. Emission The organization requires rigorous emissions commands. Emitting the sulfur gases were emitted by the driven volcano. Endangered The Sea Turtle is an extinction species. Storage of energy conservation is an energy saving process. The energy of the energy source space is one of the energy sources of the future. Windows high energy efficiency help to reduce heating costs. Environment We must protect the environment. Environmentalist environmentalists are people who love the natural world. To erode it took about 67,000 years to erode the Grand Canyon. The wind and water of erosion are the main agents of soil erosion. Evolution The introduction of cloned plants will influence evolution. Exhaust fumes in last month's officers stopped In Manchester to test the exhaust fumes. To be exposed to you, you risk skin cancer if you are often exposed to a strong sunlight. Extinct Hawaii hosts a great extinct species. F factory agriculture is factory agriculture a way of abuse of animals? The famine The Irish famine of 1846-50 took the greatest million lives from Landrella, Italy. global warming have begun a campaign to slow the process of global warming. The greenhouse effect The greenhouse effect is the increase in temperature caused by the atmosphere gas. H Our most affected city was most affected by the earthquake last year. against pollution can harm animals and the environment. to be harmful air pollution is harmful to everyone. Heat Wave towards the slow down and avoid strenuous activity if a heat wave that is happening, heavy metals less heavy metal was introduced by air in the Baltic Sea since 1990. Hydrocarbon various hydrocarbons were found in the atmosphere of Jupiter. The industrial waste industrial waste may contain small quantities of radioactive materials. Often fibreglass insulation is used as roof insulation. The loss of oil spilled from the tank. To charge the owners of local factories are loaded with new environmental laws. M marine life around the islands marine life is seriously threatened by the oil spill. Hugo hurricane threat threatening the US coast for seven days. N natural gas for 61 percent of US households used natural gas for heating wildfire large oil slicks 2002. Or were found near the coast. overfertilization overfertilization is a common problem. oxygen the cells need oxygen to survive. ozone layer The ozone layer shields the ultraviolet radiation from the sun. P permission Ask for permission to cross private land of privilege. poison the cat was killed by rat poison. Poison has lots of poisonous plants in his garden. If the polar ice caps ice caps melt, the ocean levels rise. polluting Please do not pollute the air. Pollution Air pollution is a problem for all of us. Central electric power plants are only about 40 percent efficient. precipitation Rain, snow, hail and sleet are types of precipitation. Conservation is interested in historic preservation. Prevention of waste prevention is very important. To protect Russia wants to protect the environment in the Baltic region. to purify You can purify water with two chemicals: chlorine bleach and iodine. R radiation radiation is used for medical reasons. rainforest tropical rainforests are the oldest living ecosystems on Earth. recycle this paperboard is made from recycled paper. Corrective action of the Great Lakes Remedy Plan Program was created in 1987. A renewable energy system converts renewable energy found in sunlight, wind, falling water, waves, geothermal heat or biomass. There are two types of reusable plastic bottles: Reusable bottles and single-serve bottles. S for the screen by screen should your eyes from the sun during hiking in the mountains. sea level Death Valley is 86 meters (282 feet) below sea level. purification of waste water, used water, comes from factories and households. The city sewage treatment plant needs to have a sewage treatment plant. sludge sludge is often used on agricultural land. Soil Soil is the top layer of earth in which the trees, etc. plant grow. solvent benzene and turpentine are solvents. Hunger Hunger is the most severe form of malnutrition. stratosphere The ozone layer is within the stratosphere. surface About 70% of the earth's surface is covered with water. T threatening toxic chemicals threaten sea turtles. tide The tide's in / Wood wood is wood for the construction of ships and houses. Toxic waste ship with toxic waste is sunk. Dumove of toxic waste The dump of toxic waste was built. Trawler Trailer fishing boats are not allowed on the lake. U Lead-free petrol is less harmful to the environment. Non-treated coastal cities often discharge their waste untreated at sea. urbanization urbanization is a worldwide trend. Waste W heat The use of residual heat reduces electricity consumption. Maseful paper recycling paper waste is a favorable method. Differentiated collection Sai Sai Do waste separation? Wind energy wind energy is widely used in South Africa for water pumping. Windpark / WindFarm Offshore WindFarms were built. Our B1 environment vocabulary helps you use the words associated with this topic. There are puzzles and quizzes to strengthen your learning, so you feel sure you use the text on the environment. Propractice Your English spelling and learning the new vocabulary with these funny online exercises for Cambridge Valument English B1 Preliminary examination. Ambient examination: VocabularyActivity environment Particularly useful are the exercises that are focused on a theme or a topic as they provide word retention practices so you can be confident to read, write, talk and listen successfully. The most words meet and understand, your day-to-day vocabulary will become. Our word games and puzzles are an excellent way to help strengthen spelling in your mind. I add reading and writing of exercises regularly. Why not bookmark our site, so you can go back to practicing anywhere or at any time of day? Also, add listening and language exercises to practice for this part of the 2-television test A2.Cambridge English Examinations: Cambridge English Exams are designed for students at all levels from the pre-intermediate level Cambridge English: Key (Ket) At the very advanced level Cambridge english: competence (CPE). These exams give candidates the proof of their ability to use English in a wide variety of contexts, relevant to work, study and leisure activities. Button A2 | B1 preliminary | B2 First loading page. Please wait. Acid rain containing large quantities of harmful chemicals due to burning substances such as coal and oil. Biodegradable able to decay naturally and harmless. Biodegradable packaging helps to limit the quantity of harmful chemicals released into the atmosphere. Biodiversity The number and variety of vegetable and animal species that exist in a particular environmental area or in the world in general, or the problem of preserving and protecting this. A new biological national survey to protect the species habitat and biodiversity. Carbon monoxide The poisonous gas formed by carbon combustion, especially in the form of car fuel. Carbon dioxide The gas was formed when carbon is burned, or when people or animals breathe. Climate General weather conditions are usually found in a particular place. The Mediterranean climate is good for growing citrus fruits and grapes. Climate change There was a growing concern about climate change. Deforestation The cutting of trees in a vast area; The destruction of forests by people. Deforestation is destroying large areas of the tropical rainforest. Desertification of the process with which the earth changes in the desert. Disposable products describe an object that is destined to be thrown away after use. The disposable diapers save a long time when there is little or no rain. This year (a) severe security has ruined crops. Earthquake a sudden violent movement of the earth's surface, sometimes causing great damage. Endangered species Birds / plants / animal species or plants that could soon exist because there are very few now live. Energy Power from something like electricity or oil, which can work, how to provide light and heat. There are different types of energy: solar, nuclear, hydroelectric ... The energy generated by the windmill guide all drainage pumps. Energy conservation The process of conservation of the energy environment Air, water and earth in or on which they live Animals and plants. Some chemicals have been banned because of their harmful effect on the environment. The extinction Many species of plants and animals are in danger of / threatened with extinction (= be destroyed so that they do not exist more) flood a large amount of water that covers an area that is usually dry. Strong, unpleasant fumes and sometimes dangerous gas or smoke. The petrol fumes always make me feel bad. bad. Resources things like minerals, forests, coal, etc. existing in a place and can be used by people. Some natural resources, such as natural gas and fossil fuels, cannot be replaced. Global warming a gradual increase in world temperatures caused by polluting gases such as carbon dioxide that are collecting in the air around the ground and preventing heat escape into space. Green effect An increase in the quantity of carbon dioxide and other gases in the atmosphere that is believed to be the cause of a progressive heating of the earth's surface. Green Peace Organization of one that fights for environmental protection. renewable energies describes a form of energy that can be produced more rapidly is used. Renewable energy sources such as wind and motion wave black tide A layer of oil floating on a vast area of the sea surface, usually due to an accident caused to escape from a ship or on the container. Ozone layer A layer of high air above the earth, which contains a lot of ozone, and that prevents harmful ultraviolet light of the sun to reach the earth. Scientists believe there is a hole in the ozone layer. pollution damage caused by water, air, ... to harmful substances or waste. Waste garbage recycling collection and treatment to produce useful materials that can be reused. sustainable development, a development that is causing little or no damage to the environment and therefore able to continue for a long time. A great international meeting took place with the aim of promoting sustainable development in all countries. Tsunami extremely great wave caused by the movement of the earth under the sea, often caused by an earthquake (= when the earth trembles) unleaded petrol describes a type of petrol or other substances that does not contain lead. Use natural resources The degradation of natural resources causes human pressure volcano a mountain with a large circular hole in the upper part through lava (= liquid hot rock), gas, steam and dust are or have been forced out. Erupt volcanoes discharge massive quantities of dust in the stratosphere. Wasting unwanted matter or material of any kind, often that remains after substances or useful parts have been removed. Other Related vocabulary: garbage, garbage, garbage. Other Related Materials: Materials:
