—The certificate containing the detailed information about the file Verify—Acronis True Image 2018 will check the file authenticity. For a cloud backup, the Acronis Cloud web application will open. On the Files tab, browse to the required file, point to the file name, and then click the View certificate icon or the Verify icon. See the commands description above. The easiest way to verify a file's authenticity is to use the Verify command in Acronis True Image 2. For example, to calculate the md5 hash for the picture.png file, type: 3. Check that the calculated md5 hash is equal to an eTag in the DATA field in your notarization 1. Open a blockchain explorer, for example . 2. Enter the TRANSACTION ID from the certificate into the search field. 3. Check that the Data field in the Event Logs tab is equal to the ROOT value in your certificate. 2. Follow the instructions at: . Page 421 Copyright © Acronis International GmbH, 2002-2017 Acronis True Image 2017, or a later version, is installed on your computer. The Acronis True Image mobile app is installed on your mobile device. Your mobile device and your computer are connected to the same Wi-Fi network. 2. On the sidebar, click Backup, and then click Add Backup. 3. Click the Backup source area, and then select Mobile device. 3. Tap Scan QR code, point your camera at the QR code on the computer screen, and then wait 4. Allow Acronis True Image to access the data that you want to back up. When you select all the data items, the backup starts automatically. Otherwise, tap Back up anyway. 5. [Optional] If you want data changes (for example, new photographs) to be backed up Acronis Cloud might be unavailable in your region. For more information, click here: Page 522 Copyright © Acronis International GmbH, 2002-2017 Access cloud backups from all your mobile devices and recover data from these backups You can view additional information and download Acronis True Image for mobile devices from the default folder /Library/Application Support/Acronis Mobile Backup Data/acronis-local-data/. When you change the destination, the acronis-local-data folder is moved to the location that you select. During this operation, the current mobile backups are paused and will automatically resume when Note: All mobile backups are always stored in the same folder and cannot be separated. 1. In the Backup section, right-click a mobile backup and then click Move. 2. Click Select location, and then select a new location for the backups. Note, you can select a Page 623 Copyright © Acronis International GmbH, 2002-2017 Follow the link. . On the sidebar of Acronis True Image 2018, click Backup, click Add Backup, click the Backup 3. On the sidebar, click Resources, click Add, and then choose Facebook. 4. Click Back up Facebook. 6. Click OK to allow Acronis True Image 2018 to access information from your Facebook account. 7. Configure the backup by selecting the items that you want to back up and setting a schedule for 8. To start the backup, click Run now. Page 724 Copyright © Acronis International GmbH, 2002-2017 1. Click Settings, choose backup frequency, and then specify the start time. 2. After you have configured all settings, click Apply. Page 825 Copyright © Acronis International GmbH, 2002-2017 1. When configuring the first backup process, click the Settings icon, and then click Encryption. 2. Enter the password for the backup into the corresponding field, and then click OK. In addition to the number of versions, you can limit their age. Select the Delete version older than Page 95 Copyright © Acronis International GmbH, 2002-2017 Apple File System (APFS) support—Acronis True Image 2018 now supports APFS, the newest file Backup activity and statistics—For every backup, you can easily view how many times it was Ransomware protection—Ransomware is malicious software that encrypts your files or blocks Detecting injections, that is attempts of ransomware to inject malicious code into healthy Using Machine Learning technology. This technology allows us to analyze big data, update Acronis Active Protection dashboard—This is your new command center of anti-ransomware User interface improvements—The following interface elements were added or improved: Three tabs for full control of every backup were added: Backup, Activity, and Recovery. Mobile backup and social network backup were moved to the backup source section. The Page 1050 Copyright © Acronis International GmbH, 2002-2017 Click Browse in Finder, and then select the files to archive. 4. Click Select destination, and then select Acronis Cloud or a custom local destination for the 5. [Optional step] Click the gear icon to configure additional settings. You can: Protect your archive with a password and encryption at Settings —> Encryption. Refer to Select a preferred data center and configure the upload speed at Settings —> Advanced. 6. Click Start Archiving. 7. Confirm that you want to move your files to the archive and automatically delete them from your 1. When configuring the first archiving process, click the Settings icon, and then click Advanced. Page 1151 Copyright © Acronis International GmbH, 2002-2017 2. Select the country that is closest to your current location, and then click OK. Maximum (available for online backups only) Note: You cannot set or change the archive encryption option for a pre-existing archive. 1. When configuring the first archiving process, click the Settings icon, and then click Encryption. 2. Enter the password for the archive into the corresponding field, and then click OK. When your files are successfully archived, you can access them in: Open Finder, and then click Acronis Drive archiver Favorites. Acronis Cloud (applicable to the cloud archive only) Open Acronis True Image 2018, click Archive, and then click Open in web browser. Go to log in to your account, and then click Page 1252 Copyright © Acronis International GmbH, 2002-2017 7 Tools Acronis Active Protection	52	Page 1353 Copyright © Acronis International GmbH, 2002-2017 do not, you will be able to blacklist this process. In this case, this process will be blocked every time it To allow the process to modify the files, click Trust. If you are not sure if the process is safe and legal, we recommend that you click Block. In any case, next time the process is run Acronis True Image modify your files, select the Remember my choice for this process check box, and then click Block or corrupted in any way. If this is the case, click Recover modified files. Acronis True Image 2018 will Temporary file copies that were preliminarily created during the process verification To make this action the default, select the Always recover files after blocking a process check box. Page 1454 Copyright © Acronis International GmbH, 2002-2017 To open the dashboard, start Acronis True Image 2018, and then click Active Protection on the Page 1555 Copyright © Acronis International GmbH, 2002-2017 "Acronis", "Acronis Compute with Confidence", "Acronis Recovery Manager", "Acronis Secure Zone", with the Software and/or Service at Page 166 Copyright © Acronis International GmbH, 2002-2017 To create a bootable media, you can use any removable drive with 4 GB (or more) of free space. You need to have administrator privileges to run Acronis True Image 2018. 1. Download the Acronis True Image 2018 setup file from the Acronis website: 2. Read and accept the terms of the license agreement and the Acronis Customer Experience 3. Double-click the Acronis True Image 2018 setup file (the file has a .dmg extension). 4. Drag the Acronis True Image 2018 icon to the Applications folder. Page 1736 Copyright © Acronis International GmbH, 2002-2017 Backup state indication: Icon Description The backup successfully completed. The backup is queued. (blinking) The backup is in progress. The backup was paused by user. The last backup failed. The backup completed with warnings. Command Description Name This command sorts all backups in alphabetical order. To reverse the order, select Z —> A. Date created This command sorts all backups starting from newest to oldest. To reverse the order, select Oldest on top. Sort by Date updated This command sorts all backups by date of the last version. The newer the last backup version, the higher the backup will be placed in the list. To reverse the order, select Least recent on top. Size This command sorts all backups by size, from biggest to smallest. To reverse the order, select Smallest on top. Source type This command sorts all backups by the source type. The order is as follows: entire PC backups - disk backups - file backups - nonstop backup. Destination type This command sorts all backups by the destination type. The order is as follows: internal disk drives - external disk drives - NAS devices - network shares - Acronis Cloud. Page 1835 Copyright © Acronis International GmbH, 2002-2017 Icon Description Entire Mac backup Note: The appearance of this icon depends on the type of your Mac. Disk-level backup File-level backup of folders or several files. File-level backup of a single file. Page 1934 Copyright © Acronis International GmbH, 2002-2017 3. Type bash "[script_path]" "[vm_path]", where [vm_path] is a path to the folder, where the recovered virtual machine files are located. If the virtual machine is running, backup of the Boot Camp partition will fail in most cases. If the virtual machine is suspended, backup of the Boot Camp partition will succeed, but recovery If the virtual machine is suspended, recovery to the Boot Camp partition will fail. Instead, remove Page 2033 Copyright © Acronis International GmbH, 2002-2017 5. Click Create Account. 6. A message will be sent to the email address that you specified. Open this message and confirm 2. In the File menu, point to Acronis Cloud Storage, and then click Buy Subscription. 3. Follow the on-screen instructions to proceed with the purchase. Page 2132 Copyright © Acronis International GmbH, 2002-2017 1. In the Acronis True Image menu, click Account > Email Notification Settings. The Email notifications page of the Online Dashboard opens in your web browser. 4. Type a message subject template by using the following variables: 3. In the File menu, point to Acronis Cloud Storage, and then click Start Trial or Buy Subscription. To access the application, go to log in to your account. 2. Select Acronis Cloud as a destination for your backup. The login window will open. 3. Click Create Account. To keep your personal data secure, choose a strong password for your account, guard it from falling into the wrong hands, and change it from time to time.
