This area serves you as information-database of all current products. Here you will find all downloads stored in one place. You can select between Turntables and HiFi Electronics and go there to each desired Line. You will find all information about your product here, where you can also download them. You will find manuals, product info sheets as well as firmwares and drivers here. Turntables > A1.2Technical SpecificationsDownloads High audio performance fully automatic turntable We have always had one purpose since our establishment in 1991: bring HiFi Stereo music enjoyment to as many people as possible. With the A1 we added a completely new range to our portfolio: The AUTOMAT line. The technology allowed us to make automatic turntables without degrading the sound quality & make listening to vinyl easier than ever. The automatic drive is still handmade in Germany by a traditional manufacture with a wealth of experience in making automatic turntables. The assembly is done in the Czech Republic by technicians with decade long experience. This technically reliable technology is what enables us to bring the Pro-ject sound and philosophy to an entirely new audience, and, with it, affordable and accessible high-quality HiFi to people's homes. Due to the big success of the A1 we want to go even further and updated the drive system and platter. Smooth high quality audio reproduction with low background noise and high tracking accuracy. The new precision balanced CNC machined die-casted aluminium platter guarantees a perfect playback. The automatic drive is still handmade in Germany by a traditional manufacture and the assembly is done in the Czech Republic by technicians with decade long experience. The A1.2 has a fully automatic start/stop with the automatics being completely disengaged and decoupled during the entire runtime of the record. The fully mechanical automatics are engaged when you press start and the tonearm is automatically moved to the lead in groove of the record. Once playing, the automatics are completely taken out of the equation and do not affect the playback quality. The A1.2 features an 8.3" ultra-light-mass aluminium tonearm. Together with the Pick It MM E, which fits this design principle perfectly, we get extraordinary fast response and detail in terms of transients and microdynamics. Tracking force and anti-skating are factory pre-adjusted which make the A1.2 plug & play ready within a few seconds. This makes it perfect for vinyl beginners and experienced listeners alike as the sound quality is carried by all the audiophile features the A1.2 has on offer. To guarantee a perfect connection to your amp we use a high-quality phono RCA cable. Our Connect it E is a semi-balanced, low-capacitance cable, with superior shielding. If you don't have a phono preamplifier in your current HiFi setup you will benefit of the A1.2s built-in one. If you want to use another phono preamp, you can easily switch it off. No need to change the belt position. Easily change speed with the push of only a single button & listen to your favourite LPs aswell as singles. Speed:33, 45 (electronic speed change)Drive principle:belt drive, fully automaticPlatter:damped aluminium platterWow & flutter:33: +/-0,27%; 45: +/-0,25%Speed drift:33: +/-0,75%; 45: +/-0,65%Signal to noise:65dBTonearm:ultra-light-mass 8,3" aluminium tonearmEffective arm length:211mmOverhang:19,5mmIncluded accessories:15V DC / 0.8A power supply, dust cover, 7" single adapter, feltmat, phono cablePower consumption:1,5WDimensions:430 x 130 x 365 mm (WxHxD)Weight:5,6 kg net Click on an alphabet below to see the full list of models starting with that letter: 1 2 6 8 9 A D E J P R S T V X 8.6E
