Miui 12 global stable mi note 10

Here we are: The roll-out of the long-awaited is officially starting MIUI 12.5 from the Xiaomi Developer team. To date, in fact, those who wanted to try the news of the new Miui version has necessarily lend you to beta Rom. But with the advent of spring, the releases of the stable version of the Rom that we will find on Xiaomi, redmi and little. And as I got done with the MIUI 12, I decided to create a new article where you can find the download link for all available roms. You can find them both fastboot and recovery, offering both manual installation possibilities. In both cases, find the Installation Guide at the bottom of the article. As usual, in the event that the update released is not final, you will find the formulation indicated by the stable beta indicated. For those who do not know what they are, they are a cross between beta and stable roms. Once the beta test phase is over, you get those roms that are defined in jargon as a "release candidate", that is ready for roll-out. They are technically definitive and public roms, but they can still have some bugs and therefore are released as a stable beta to those who are part of the beta tests. You can still install them manually, but at your own risk. Updated the update: September 16stmiui 12.5 Stable: all versions available for various Xiaomi, redmi and little threw this article will gradually find all versions of the MIUI 12.5 available for various models: global, Eee and China. For the moment, since we are still at the beginning, you will find very few models but will be gradually added. Those indicated without download links mean that they are officially planned but for which the update has not yet been released. In the event that your model is not listed, it means that it is not expected to receive the update for the moment. But this could change in the future, so he continues to follow us to stay updated on this. How to install MIUI 12.5miUi 12.5 ChinaFor At the moment, on some models the MIUI 12.5 is only available in the form of a stable Roma of China, so without Italian language and with Google services absent by default. This means that if you have a global or seea ROM, you will have to do it to move to the branch of China unlocking the bootloader. Once unlocked, you need to switch to TWRP Recovery custom compatible with the model to install the ROM. These steps involve the formatting memory, then backing up the data you want to keep if necessary. This point, download the recovery ROM for your smartphone and copy it to its internal memory. Here is the procedure to follow: Turn off the smartphone and start it in FastBoot Modeconnect it to the PC via USBIN The ADB folder (usually "platform tools") Press and hold the Shift key, right-click on an empty point and Select "Open PowerShell Window here" Enter the "FastBoot devices" command Å, to verify that the smartphone is properly revealed (a alphanumeric string should appear) Enter the "FastBoot Boot Recovery TWRP.IMG" command (instead of "TWRP" enter The exact name of the TWRP file name you are using) and press Enter while holding down the Volume Up button to start the smartphone in TWRP modefrom the TWRP screen, click "Install" and select the ROM filestart recovery the installation procedure and Restart your smartphone 12.5 Global / EaEAlF, on the other hand, you have a smartphone with MIUI 12 GLOBAL / SEE and MIUI 12.5 GLOBAL / SEE was released, so it's bit You can proceed with the installation without changing the passages.Recovery modendame the downloaded file to "update.zipÅ ç å, = option by pressing the PowerStall button and choose" Restart "If you do not restart modedownloadÅ ç MiFlash tool, extract the archive and install the SoftwareRestart software Smartphone in FastBoot mode: to do this, hold down the Power and Volume Down Down key A few seconds when you turn offconnect the smartphone to the PCSTART MiFlash tool, click on "Select" and select the "FirmwareÅÅ ç folder in the FastBoot Rom ROM folder on "Clean all". set next to" flash_all.bat "and then on" Flasha at the top to the right to start the update installed modeDownload the ROM and copy it to the Smartphone MemoryGo to "System Settings / Info" click on the MIUI logo at the top left button on the three points on top RightSelect "Choose the package update" Choose the ROM in the Memory and start UpdateIf These methods do not work, then you necessarily have to act as if it were a Roma Roma. In this case, refer to the previous response ChangelogsysteemGesture Chapter.miui 12.5 now is instantwith 20x more rendering power, now there are some limits to what you can see on the custom screen.with settings based on the device model, Any phone becomes faster after upgrading.
